

Franco Nicolás Carballes

E2E Full Stack Developer · Secure and Product-Oriented Architectures

Córdoba Capital, Argentina | +54 9 351 861 0001 | franco.ncarballes@gmail.com

Full-Time | Own Vehicle | Technical English

Portfolio: <https://fncarballes.github.io>

PROFESSIONAL PROFILE

Full Stack Developer focused on building proprietary end-to-end products: scalable and secure architectures, from the backend to the user experience. Since 2025, I have designed and developed multiple complete products (mobile, desktop, and server apps), diving deep into each applied technology rather than replicating generic solutions. Background in applied cybersecurity (CISCO). Solid prior experience in customer service, loyalty, and operational control. Ethical, detail-oriented, and results-driven approach.

SKILLS & TECHNOLOGIES

- **Frontend:** React, React Native, TypeScript, JavaScript, Tailwind CSS, Vite, Zustand
- **Backend:** Node.js, Express, Socket.IO
- **Databases:** MongoDB, Mongoose, Firebase, Redis
- **Cloud/Infra:** Google Cloud, Cloudflare, Google Maps Platform (Geolocation API / Places API / Place Photos)
- **Other/Desktop:** Electron, Tauri, Expo
- **Validation/Tools:** Zod, Git/GitHub, Figma, Linux/Kali Linux
- **Security & Networks:** Cybersecurity Analysis (CISCO), secure development principles.
- **Soft Skills:** Autonomy, problem-solving, assertive communication, project management, customer service, empathy.

FEATURED TOOL AMC (Auto Media Converter):

Desktop application (Linux/Windows) developed for automatic image optimization. Achieved up to a 98% reduction in file server storage costs without noticeable loss of quality. (See portfolio)

PROFESSIONAL EXPERIENCE

Burger Sale | Founder & Full Stack Developer 01/2026 – Present

- Complete and functional product, validated in real environments (APK and .exe builds, ngrok tunnel testing); currently in the commercialization stage with prospects.
- Cross-platform architecture: mobile app for clients (shopping cart and loyalty points system), desktop and mobile app for internal management (sales, metrics, and branches), and centralized server with Role-Based Access Control (RBAC).
- Event-driven architecture with Node.js, Express, Redis as cache, and MongoDB as the main database.
- Designed to support up to 10,000 simultaneous connections via WebSockets.
- Authentication with RS256 tokens, bcrypt encryption, and secure management of secrets and environment variables.
- Integration with Google Maps and Places API for user geolocation and branch logistics.
- UI/UX with React Native (Expo), React Query for server state, and Zustand for global state.

AAPG UNC – Website | Developer 01/2026 – Present

- Developed the institutional website following organizational standards.
- AI bot for oil industry news aggregation (twice a day), featuring automatic switching between Gemini and Groq as a fallback.
- Bot System: Developed a bot that periodically collects information and temporarily stores it (1-month retention), feeding a static news site. Deployed on Cloudflare Workers with Cron Triggers and Cloudflare Pages for the frontend.

Frieng Zone | Founder & Full Stack Developer 01/2025 – Present

- Product in active development as a solo founder, scheduled for launch in 09/2026.
- Event-driven architecture with Node.js, WebSockets for real-time chats, MongoDB, and Firebase for file servers, achieving a 98% storage savings using AMC and metadata removal.
- Implementation of interactive maps and location services via Google Cloud.
- Authentication with RS256 tokens, bcrypt encryption, and secure management of secrets and environment variables.
- UI/UX with React Native, React Query, and Zustand.
- IP and user ID rate limiter.

Independent | Logistics & Delivery 04/2020 – 12/2025

- Route management and delivery logistics.

Los Monos – Food Delivery | Owner 08/2019 – 03/2020

- Strategic business planning: menu design and advertising campaigns.
- Supplier management, purchasing of supplies, and delivery logistics coordination.

Levi's – Buenos Aires | Shift Manager / Sales Associate 02/2017 – 03/2019

- Managed a sales team of up to 4 people, scheduling, and performance audits.
- Administrative and financial management: cash control, opening/closing registers, balancing, and bank deposits.
- Inventory control and maintenance of brand visual standards.

EDUCATION

- **Full Stack Developer – JavaScript Environment Specialization** · Mobile, Web, and Server Development (Full Stack) | 2025 – Present
- **Full Stack Developer** · Coderhouse | 2024
 - *Frontend Languages: HTML, CSS, JavaScript.*
- **TypeScript Fundamentals** | 2024
- **Cybersecurity Analysis** · CISCO Academy | 2023
 - *Network fundamentals, threat detection, and applied security principles.*
- **Technical English** · CISCO Academy | 2024
- **Intensive English Course** · Facultad de Lenguas UNC | 2023
